Since its origins in the 1970's, BD Barcelona Design has always been an atypical company. Its founders and still current owners, who come from an architectural background rather than the business field, have oriented BD's production from the very start by cultivating beauty, in some cases above function. Accompanied with artisanal processes instead of mass production, the new products always have more proximity to art than industrial design.

Barcelona Design History

Grasso Collection

“Grasso is not fat. Grasso is more than fat. It’s a bit sloppy and overflowing. It’s uncontrollable. These are the ideas of comfort we wanted to play with the Grasso collection. Both, in the upholstered furniture pieces and in the ceramics, there is a feeling of forms reaching the limit of expressiveness. Pushing away from the foundation of the exaggerated expression of traditional overstuffed upholstery allowed us to find an unexpected place of abstraction where the voluminous form not only recalls the traditional smoking lounge chair but also expresses something of the artistically absurd.” Stephen Burks
